- NEW * ***Astrogeographia: Correspondences between the Stars and Earthly Locations*** by Robert Powell and David Bowden. As Rudolf Steiner indicates in the Astronomy Course: "We can conceive of the active heavenly sphere mirrored in the Earth." Astrogeographia is the science that determines this mirroring, i.e. that there is a one-to-one correspondence between the encircling starry heavens—the celestial sphere—and the sphere of the earthly globe: for example, the city of Vienna mirrors on Earth the star Aldebaran (the "Bull's eye") in Taurus.
- * NEW * ***The Astrological Revolution: Unveiling the Science of the Stars as a Science of Reincarnation and Karma*** by Robert Powell and Kevin Dann. Humanity has for many centuries employed astrology to penetrate the mystery of the stars' relationship to human destiny. Through the newly discovered rules of astrological reincarnation, it has been discovered that the sidereal zodiac presents an authentic astrological zodiac, enabling a new practice of astrology, one that offers tools to reestablish a wisdom-filled astrology in the modern world.

The Second Coming of Christ is the true event of our time; the incarnation of Satan/Ahriman is its shadow, and Divine Sophia is the antidote to the negative consequences of Ahriman's incarnation. Also discusses the significance of young anthroposophist Judith von Halle, who since Easter 2004 has born the stigmata—the visible signs of the wounds of Christ.
