

*ATTUNING TO THE STARS:
STAR-GAZING AS A SPIRITUAL PATH—THE SIRIUS MYSTERY*

Seminar with Dr. Robert Powell

Sunday, 2 July – Friday, 7 July 2017

Four full days: Monday-Thursday; arrival Sunday, 2 July for dinner; departure Friday, 7 July after

Castle Titignano - 05018 Orvieto (TR), Italia

English/German – with translation into Italian by Uberta Sebregondi

During this seminar, Robert Powell will present some new research findings, especially relating to the year 2017, opening a path through which we can reconnect with the cosmic and spiritual dimensions of what is taking place in the world at the present time. The focus of Robert's research about the significance of 2017 is related cosmically to the entrance of Saturn into Sagittarius and the three conjunctions of Saturn with the Galactic Center (2° Sagittarius) during 2017, bearing in mind also that Saturn was in conjunction with the Galactic Center at the death and assumption on 15 August AD 44 of the Virgin Mary. The year 2017 is also the one hundredth anniversary of the Bolshevik revolution, which had such a devastating effect upon the world—an effect that to a high degree shaped the course of the twentieth century. In addition, against the background of cosmic events we shall also look at significant changes in the world in our time due to the new political configuration of the western world.

Moreover, on Thursday, July 6, 2017, the Sun will be aligned in conjunction with the star Sirius, concerning which Rudolf Steiner indicated: *“On Sirius one hears everything that people think. Sirius is the heart of Jesus-Zarathustra and is in the depths of the Earth. Sirius is the world-thought which Christ produces out of his heart—therefore it is to be found within the Earth.”* He drew a curve to represent the Earth and wrote upon it, *“Metabolism and fulfillment”* as though the thoughts issuing from the heart of Christ—that is, from the Sun—are sent through Sirius to the center of the Earth, where they attain their fulfillment by means of metabolism. These words of Rudolf Steiner were recorded by Johanna von Keyserlingk in *The Birth of a New Agriculture: Koberwitz 1924* (edited by A. Keyserlingk; Temple Lodge Press: London, 1999), pp. 89-90. We shall endeavor to come to a deeper spiritual understanding of these words and of the relationship of Master Jesus (Zarathustra) to the star Sirius, the brightest star in the heavens, and of the relationship of Sirius to the center of the Earth.

Attuning to the Stars

At Castle Titignano we have beautiful conditions for star gazing, which we shall practice with the goal of developing a modern path of the magi to find the spirit in the universe. Moreover, thanks to Rudolf Steiner's clairvoyance, eurythmy originated, through which we have received the gestures and sounds corresponding to each planet and zodiacal sign. These gestures open gates of access to cosmic forces. We shall explore the star mysteries through star-gazing and consciously reconnect—through the archetypal gestures and sounds of the cosmic dance of eurythmy—to the heavenly bodies and their spiritual forces, bringing harmony into ourselves and our surroundings, by dancing to violin music the cosmic dances of the planets in the signs of the zodiac, according to what we see in the starry heavens through star-gazing.

The inspired movements of cosmic dance allow vital currents of life forces to flow inside and around us. One could consider sacred and cosmic dance as meditation in movement, leading to a connection with the highest aspects of the cosmos manifesting through the planets and the signs of the zodiac.

Robert Powell is an internationally known lecturer and author. He was awarded a PhD by the Polish Academy of Sciences for his thesis on the history of the zodiac. In 1982 he completed the training in

eurythmy at the Goetheanum in Dornach (Switzerland). He is a co-founder of the Sophia Foundation and he is also founder of the Choreocosmos School—the School of Cosmic and Sacred Dance.
