The deeper significance of Christ's descent into hell as a descent into the underworld to reunite with the Mother is knowledge that belongs to the Grail mysteries. And it is this mystery of the descent to the Mother which is central to Christ's second coming.

Since the time of ancient Greece, following the rise of Christianity, knowledge of the Mother and the "secrets of the depths" has more or less disappeared from human consciousness. But now, in the twenty-first century, through the second coming of Christ, a new access to the Earth Mother and her mysteries is opening up. A three-fold mystery is connected with the Mother: that of the Name of the Mother ('Demeter' to the Greeks); that of her Kingdom ('Shambhala' to the Orient); that of her Will (eternal faithfulness to the Father, despite the fact, since the Fall, of the Mother's withdrawal into the darkness of the underworld).

The earthly sphere of humanity, in which human beings normally spend their waking existence between birth and death, is placed between the nine cosmic spheres of the spiritual hierarchies above, extending up to the Kingdom of the Father, and the nine sub-earthly spheres of the powers of evil below, which are situated in the interior of the Earth, inserted between mankind and the Kingdom of the Mother. All human beings incarnated upon the Earth are subject to the interplay of that which works into them from the heavens above and from the realms below. Generally speaking, that which rises up from below is of a subconscious nature, and the forces of evil rising from the nine sub-earthly spheres into the human being's subconscious have to be overcome - a first step being that of becoming conscious of these evil forces. However, not everything which rises from below is evil, for that which belongs to the Kingdom of the Mother also works into the human being from below. How we can begin to understand this mystery and what it means for us that a path to Shambhala, the lost paradise, is beginning to open in our time, is the subject of this lecture.

Live piano music played by Marcia Burchard will precede and follow the lecture.
